

TigerTough[™]

**SEAT COVERS
THAT WORK**

TigerTough™

We started out as a custom sewing company that was focused on quality and craftsmanship, turning out anything that could be sewn together. One of our customers asked if we could make covers for the seats in their trucks because their drivers were ruining them long before they were ready to get rid of the trucks. We obliged, and here we are today. (Yes, that customer still uses TigerTough covers in their trucks, over 25 years later.)

We aren't a custom sewing company anymore but we still work to turn out the highest quality product and experience we can. Every seat cover we build is precision cut, double stitched, and individually inspected because we're not OK with letting you down.

When you put your trust in TigerTough, you're getting more than just a seat cover. You're getting the support of our whole team to make sure your vehicle is something you can be proud of.

We're here to do more than sell you something and run off with your cash. Our mission is to help vehicle owners find and eliminate hidden costs. If you own a vehicle, or manage a bunch of them, you know that they're expensive. If we can help you recover some of that expense, we've done our job.

Whether you're looking for a solution for a service truck, delivery van, police car, fire truck, or your contractor-by-weekday, boat-hauler-by-weekend truck, we can help you out.

You do your thing, we'll worry about the seats.

IRONWEAVE

TigerTough Ironweave™ seat covers are built specifically for work trucks and vans. Each one is made from American made 1000 denier Cordura®. They're precision cut and double stitched so you can be sure that once you put them on they'll fit right, look good, and handle whatever you throw at them.

We're here to do more than help you look good though. We're here to help you eliminate wear and tear on your interiors, something that has been accepted as "normal", for far less than what it's costing you to fix or what you're losing in resale value.

When you can stop worrying about what fixing a torn seat is going to cost or how long it takes a tech to replace it when there is more important work to do, it doesn't take long for your covers to pay for themselves.

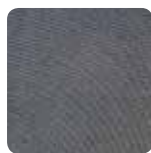

Your fleet is a giant, multi-piece billboard that is always representing your company. How do you want that to appear to your potential customers? How do you want it to appear to the folks that drive the trucks every day? With tough-as-nails Ironweave™ seat covers, it's easy to keep your trucks' interiors in good condition and even promote a little more of your company's image with custom embroidery.

No matter how big your fleet is, you can benefit from using TigerTough Ironweave™ seat covers in your work trucks.

TACTICAL

Why exactly does a police car need seat covers?

The major reason that you need to protect the seats in your cruisers is because cop cars have a tough life. They're often on the road 24 hours a day, with the officers getting in and out every few minutes. With that kind of strain, a duty belt will wreak havoc on the factory upholstery the cars come with. Torn seats are ugly, uncomfortable, and expensive to fix but what can you do about it?

TigerTough Tactical seat covers are the answer. Our Tactical seat covers are designed specifically for law enforcement vehicles. They fit tight, they don't move around, and they're safe to use with in-seat airbags. We make them all from 1000 denier Cordura® because it's got a higher abrasion rating than Kevlar. The Tactical seat covers all get our water resistant coating to make sure that any spills wipe right off.

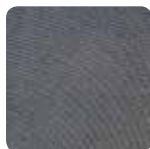

By eliminating the "normal" wear-and-tear, you'll be able to have your technicians work on bigger problems rather than removing seats and sending them away to get fixed. Between the cost savings and the extra money you'll be able to sell your used cars for, it doesn't take long to justify the investment in quality seat covers.

TigerTough Tactical seat covers are set apart from other covers because of the Ironband™ reinforcement we've developed. The Ironband™ is inside the lower third of the cover because that is the area that takes the most abuse from your duty belt. We've beefed up the toughest covers out there so you don't have to worry about torn seats. We've got this.

SPORTWEAVE

We've built our Sportweave™ line of seat covers for people that know the limits and push past them.

You probably know the struggle of trying to keep your truck looking good after a day at the lake, in the field, or in a tree stand. We don't believe that worrying about your truck should be allowed to take any of the fun out of it.

Your truck represents who you are. You're not OK with being a "bath towel tossed over the seat is good enough" kind of person, are you? We didn't think so. TigerTough Sportweave™ seat covers are water resistant, stain resistant, and life resistant.

Every TigerTough cover is precision cut, double stitched, and individually inspected so you can be confident that what you expect is exactly what you're getting. Whether you opt for solid-color covers to compliment the factory interior or you wrap your seats with one of our TrueTimber® camouflage patterns, you can be sure that what you're getting is going to fit tight, look good, and probably outlast your truck.

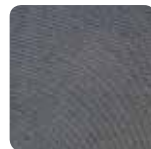

TigerTough covers are built to protect your truck and protect you at the same time. Our covers have been independently verified to work with in-seat airbags so if something bad does happen, we're doing our part to keep you safe.

If you're the kind of person that works hard, plays hard, and buys quality equipment for their truck, we'll get along just fine.

WHAT MAKES TIGERTOUGH DIFFERENT? TWO THINGS.

OUR PRODUCT

We don't build a cover that you can just toss over your seat in a hurry. Towels work fine for that.

We're here to help you find a solution that will prevent your vehicle's seats from getting worn and stained from the constant abuse that is a result of what you call a "day job" or "the weekend". Or both.

That's why we build the heavy duty, high quality covers that we do. Everything that we make is tailored to the specific make, model, and year of your vehicle to make darn sure that the covers fit perfectly, look good, and stay where they're supposed to. What good would they do if they slid around and bunched up like the cheap junk ones? You don't do generic work; you deserve more than generic equipment.

Along with looking good, we believe that you should be safe. TigerTough seat covers have been independently tested and verified to work with in-seat airbags. If the worst happens, you can know that we're not getting in the way of your safety.

We believe in our product enough to back everything with a two-year, unconditional, no B.S. warranty. If you break something, we'll fix it or replace it.

OUR PEOPLE

When you call our office (We actually like talking to people!) a real, live, human answers the phone and will take care of you right away. If people liked pushing a ton of numbers to talk to someone, we'd still be texting on flip phones. Everyone here is fanatical about our quality and making sure we are easy to deal with.

If you're interested in partnering with a company that makes a badass product and backs it up like their life depended on it, you'll probably like working with us.

WHAT'S IN IT FOR YOU?

RETURN ON INVESTMENT

A vehicle with a perfect interior looks like a well maintained vehicle and sells for more when you're done with it.

COMFORT

Nobody likes sitting on a ripped up, broken down seat with springs poking out. Our covers stay in place to keep the seats intact and help maintain their shape. They're breathable too, meaning that you won't sweat (or freeze) your tail off. This keeps your drivers comfortable and comfortable drivers are happier drivers. Happier drivers take better care of their equipment.

SAFETY

What does any of it mean if your safety is impaired? We think not much. Our seat covers have been independently tested and certified to be airbag compatible. We've got the video to prove it - ttcovers.com/ttairbag.

QUALITY

TigerTough seat covers are one of the few brands that are specifically for work trucks. We've designed our covers to stand up to the daily abuse that work trucks get. Every seat cover we build is precision cut, double stitched, and individually inspected. Why do we go to so much work? Because letting you down isn't something we're cool with.

WARRANTY

We believe in our quality and stand behind it. That's why we back it up with the best warranty in the industry. Every TigerTough cover has a two-year, unconditional, no B.S. warranty. If you break it, we'll fix or replace it. It's that simple.
